

IN THE CLAIMS:

The text of all pending claims, (including withdrawn claims) is set forth below. Cancelled and not entered claims are indicated with claim number and status only. The claims as listed below show added text with underlining and deleted text with ~~striketrough~~. The status of each claim is indicated with one of (original), (currently amended), (cancelled), (withdrawn), (new), (previously presented), or (not entered).

Please AMEND claim 1 in accordance with the following:

1. (CURRENTLY AMENDED) A recording/reproducing apparatus comprising;
a data scrambler scrambling data recorded on an optical disc, the data scrambler having a random data generator for generating random data in a cycle of 32 KB in order to scramble the data recorded on the optical disc, the data having a structure of 2 KB for a sector or a data frame and 64 KB for an error correction code (ECC) block.

2. (ORIGINAL) The apparatus of claim 1, wherein the random data generator comprises:

a 15-bit serial register r_0 through r_{14} for generating the random data by shifting left synchronized with a clock input for scrambling; and

an exclusive OR gate for outputting an exclusive OR value exclusive-ORing output from a higher-most register r_{14} and output from a lower register r_{10} to a lower-most register r_0 ,

wherein the scrambler includes an exclusive OR logic circuit which supplies a result of exclusive-ORing 1-byte input data D_0 through D_7 and each of the 8 outputs of lower registers r_0 through r_7 after left-shifting the 15-bit register r_0 through r_{14} 8 times.
